

**Activities designed for you and your child to do together —
to enjoy the Bugging Out theme and grow reading skills, too!**

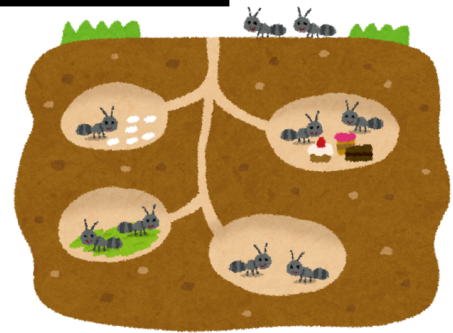

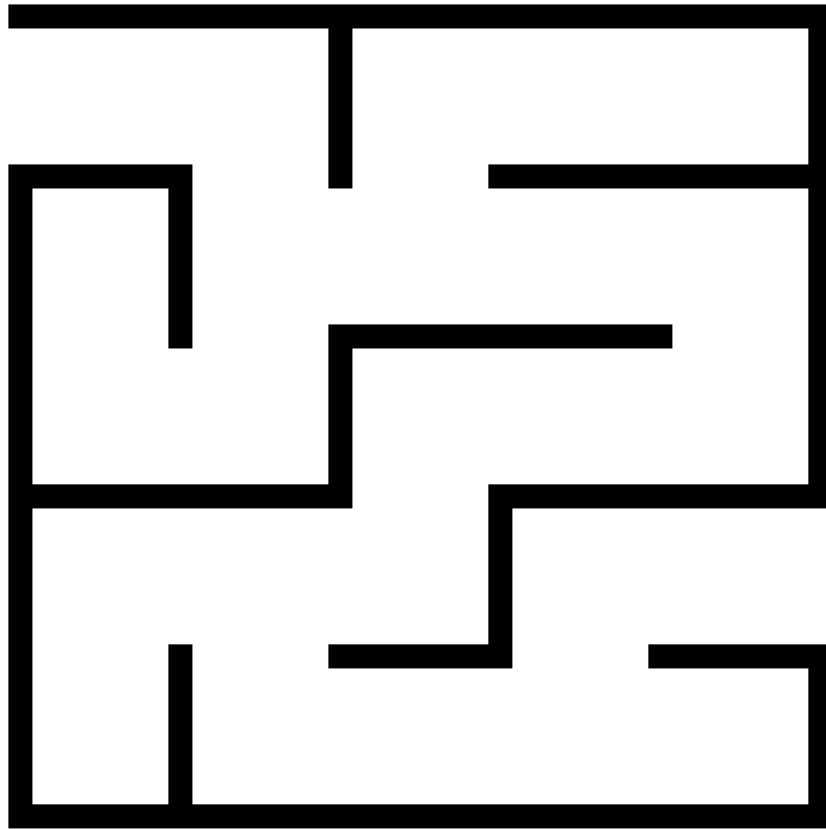

July 20- August 2, 2026

(3 yrs - kdg)

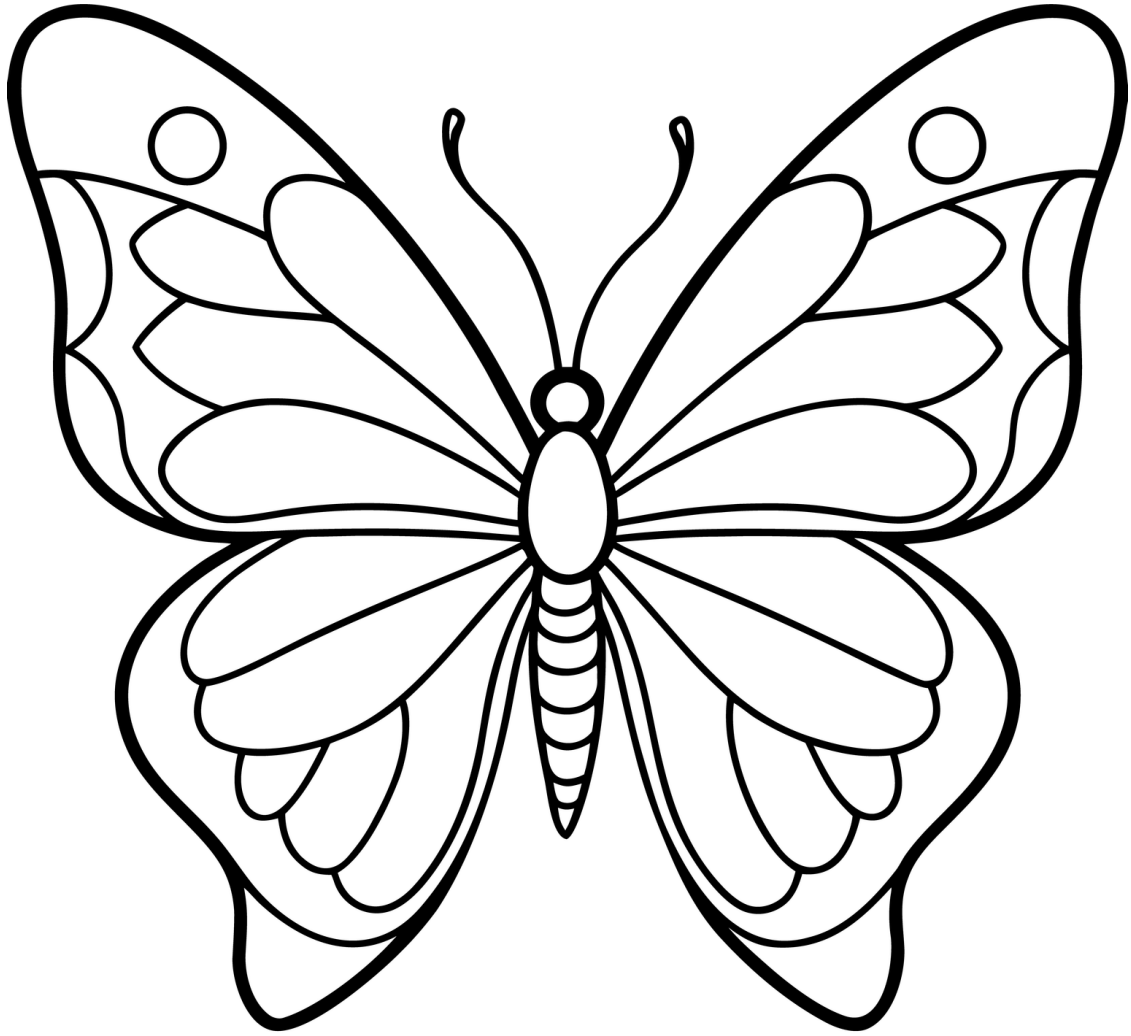

**Make sure to use the Abound app daily to start conversations about books and ideas
and build your child's reading skills...playfully!**

BUG Maze!

The ants found a leaf to bring back to their nest.
Can you draw a line through the maze to help
them find their way home?

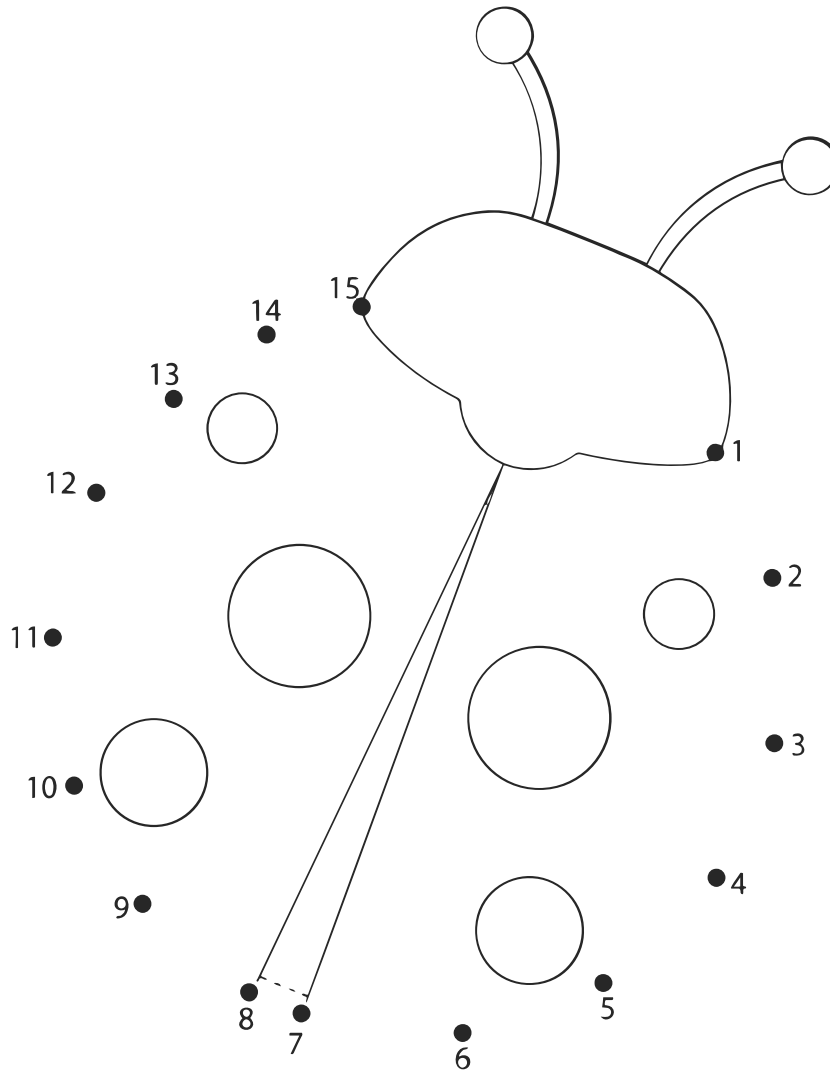

BUGS in flight!

Butterflies have two sides of their wings. Both sides have the same pattern and color. Their wings are "symmetrical," which means they look the exact same on both sides.

Can you try to make both sides of this butterfly's wings look the same by coloring them in with the same colors?

Plant heroes!

Work together to connect the dots, then color the creature!

Do you know what it is? This beetle is a garden hero because it eats **aphids** and **aphids** ruin the leaves of growing plants!

ANALYZE

7/20-7/26

To **ANALYZE** means to look closely at something to get more information.

Can you **ANALYZE** this caterpillar and find the 3 **true legs** and the 5 **prolegs** that you can see on this side of the creature? Then color the picture!

Wait – what’s a true leg and what’s a proleg??

- Most caterpillars have 3 **true legs** closer to their heads, on each side of their **thorax** (the section of their bodies that is below the head). That’s **a total of 6 true legs**. (We only see 3 in the picture because we can't see the other side of the caterpillar!) A **true leg** is hard and has tiny claws at the bottom.
- They also have 5 pairs of squishy **prolegs** in the back that have small hooks on them. That’s **a total of 10 prolegs**. Prolegs help the caterpillar grip leaves and crawl. The **prolegs** disappear when the caterpillar becomes a moth or a butterfly!

WordUp!

EMERGE

7/28-8/03

*To EMERGE means to come out from a hidden place
or come out so you can be seen.*

- Can you find the rock in the picture above? If you and a friend picked up that rock, what kinds of bugs might **EMERGE**?
- While you were looking at the bugs, what kind of animals might **EMERGE** from the nearby tree?? **Draw the bugs and other animals above!**
